Screenshots:

The image shows a web application interface for 'Meal Mate'. At the top, there is a green navigation bar with the 'Meal Mate' logo on the left and links for 'Home', 'Features', 'About', 'Booking', 'Contact', and a 'Login' button on the right. Below the navigation bar, the main heading 'Book Your Meal' is centered. The central part of the page features a white form with several input fields: 'Full Name', 'Email Address', 'Phone Number', a date field with a placeholder 'dd-mm-yyyy' and a calendar icon, a 'Breakfast' dropdown menu, and a 'Number of Persons' field. There is a blue button labeled 'Detect My Location' and a section for 'Upload Student ID / Profile Image' with a 'Choose File' button and the text 'No file chosen'. A larger text area for 'Special Requests' is at the bottom of the form, followed by a green 'Confirm Booking' button.

AI Usage Declaration:

Project Title

Meal Mate – Smart Mess Booking & Restaurant Management System

This project was developed by the undersigned student(s) as part of the academic requirements for the course/project work.

Artificial Intelligence (AI) tools, including ChatGPT, were used as an assistive technology during the development process. The AI tool was utilized for guidance in areas such as:

- Generating and refining HTML, CSS, and JavaScript code.
- Suggesting user interface designs and layouts.

- Assisting with debugging and code optimization.
- Providing explanations of web technologies and browser APIs.
- Supporting documentation and report preparation.

All AI-generated content was reviewed, modified, tested, and validated by the student(s). The final design, implementation, integration, testing, and submission of the project are the responsibility of the student(s).

The use of AI was limited to assistance and learning purposes. The student(s) confirm that they understand the generated content, have verified its correctness, and have complied with the institution's academic integrity policies.

Declaration

I hereby declare that the project work submitted is our own work. AI tools were used only as an aid in learning, coding assistance, and documentation support. The final project reflects our understanding, effort, and implementation.
